

SAVE THE DATE!
18 & 19 NOV 2020

**Department of Defense Human Factors Engineering
Technical Advisory Group (DoD HFE TAG) Virtual Event**

Resilience 2020: Are We Ready?

Date: 18 & 19 November

Time: 1230-1630 (ET) / 0930-1330 (PT)

Location: Virtual Platform TBD

The demanding nature of continuous operations and ever-changing threat vectors require military and civilian personnel to demonstrate optimal cognitive and physical performance in challenging situations. Factors such as environmental stressors, physiology, fatigue, resources, culture, leadership, and communications affect human physical, mental, and emotional states. These impacts may materialize and even compound, reducing readiness and resilience of our military forces and civilian workforce.

The focus of this virtual event is on applying an interdisciplinary, human centric approach to the exploration of challenges and solutions relating to whole system resilience as a major enabler of mission readiness and force lethality. DoD HFE TAG leadership is striving to provide this virtual forum as an opportunity for our members to sustain cross-service learning, leveraging, and information exchange across the HFE and Human Systems Integration communities. We appreciate your patience and commitment during this time.

For more information, visit the DoD HFE TAG website & social media platforms.
